## District Meal Software Suite

### District Meal Program (DsMP) for District/Central Office

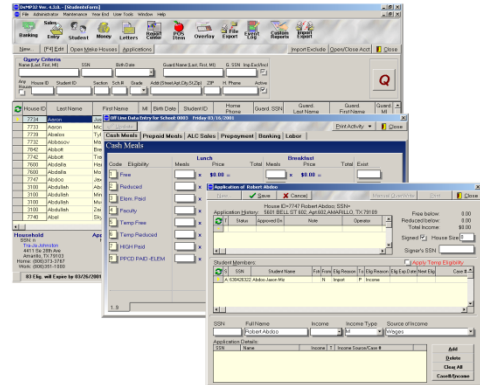

PCS' **RIGHTRAK** District Meal Software Suite provides an inexpensive yet powerful solution for school districts. It is developed for Microsoft's Windows Platform. **RIGHTRAK's** **Accountability** and **Free & Reduced** application processing modules are built into this award winning software suite.

The District Meal **Accountability** module generates participation, revenue, reimbursement claims, edit check reports for the entire district and automatically communicates between the schools.

**RIGHTRAK** provides centralized **Free & Reduced** price meal application processing and verification. The system also supports bi-directional district enrollment and school database interfaces and includes direct certification and year round multi-track calendar support.

### Features
