DELTA

LGC License and Tax Accounting System

An automated and flexible revenue system developed to assist local governments with the collection and management of Taxes, Licenses, Miscellaneous Receipts, and Permit Administration.

DELTA System Uses:

- System security will allow or disallow access, per module, to part or all of the data held within the DELTA system.
- Maintains an Audit Trail on Taxpayer Info, Change Logs, and Action Taken.
- Extensive payment history is maintained for all modules.
- Invoices and Credits can be created at any time and will allow minimum amounts to be set.
- Attachment capabilities exist that allow documents to be scanned or attached to taxpayer files.
- Complete system auditing, accessible only to users with administrator rights.

Access Methods:

- Taxpayer ID, Address, Name, Territories, Phone Numbers, License and Tax Codes, and Permit Numbers.

Potential Uses:

- Detailed Payment Processing and Reporting
- Cross Referencing
- Audit Trails
- Invoicing and Credits
- Delinquent Processing
- Print To Screen, Printer, and Text File Options
- Default Form Printing
- Attachment Capabilities
- User Defined Fields and Categories
- Schedule Inspections through MS Outlook
- Export to MS Office Professional Edition
- SIC and NAICS Code Compliant
- Advanced Security Options
- ODBC Compliant
- Complete Taxpayer Information
- Mail Merge through MS Word

Interfaces:

- General Ledger System

Complete Revenue System

DELTA

LGDPC License and Tax Accounting System

What is DELTA?

DELTA is an automated Revenue System written in Microsoft Access. DELTA has been developed to assist local governments with the collection and management of taxes, licenses, miscellaneous receipts, and permit revenues. DELTA is a complete and flexible management tool. It offers full customization facilities to address specific requirements for taxpayer identification, revenue collection, delinquency follow-up -- and much more!!!

Product Overview:

The DELTA product is a complete windows-based program that uses a one button click method to maneuver through its menus. The main switchboard includes options such as:

- Taxpayer Information
- Permits
- Payments
- Delinquencies
- Reporting
- Administrative Functions
- License, Tax, MRC, and Permit Setup

License, Tax, MRC, & Permit Setup:

This portion of the software determines the correct calculation for each site's setup. License, Tax, MRC, and Permit setups are site specific according to local ordinances and regulations. Setup tables are found within the setup menu option. These tables include License and Tax Calculations, Renewals, Forms Generation, Invoicing and Credits, Permit Calculations, Maintenance, Inspections and Drop-downs, MRC Default Amounts, and Auto-fill Notes.

DELTA Permits Administration:

The DELTA Permits program, written in Microsoft Access, is designed to assist Building and Inspection Departments by maintaining, in a regulatory manner, a vast array of automated permits and associated files. The system is a complete and flexible management tool. It offers full customization facilities to address specific permit requirements.

From the main Permits Menu, new permits can be created while existing permits are inquired into and updated. Permit setups are included in the License, Tax, MRC, and Permit Setup options. A Reporting Option is also included. Available search criteria include:

- Permit Number
- Address
- Taxpayer ID's

Accurate inspection data is logged by "Inspection Type", "Requested By", and "Inspected By" fields.

Scheduled Inspection Time and Actual Inspection Time interface with MicroSoft® Outlook '98® for detailed inspection listings.
