Point of Sale

A centralized cash management system designed to guide cashiers through the process of receipting, balancing the cash drawer, and updating the General Ledger.

Point of Sale System Features

- Security features restrict cashier access to specific receipting stations, receipt printers, or electronic cash drawers.
- Multiple charges and payment types can be entered on a receipt. The system will automatically compute the customer's change.
- Application forms (business license, property tax, etc.) can be printed while receipting.
- System Z General Ledger Interface allows accounts to automatically be updated for all charges.
- Customer history is accessible and helps determine which accounts and applications a returned check affects.
- Receipt and validation printers, electronic cash drawers, and bar code scanners can be used with the system.

Highlights

- Security
- Receipting

- Payment / Reference
- Payment Date

Interfaces System Z's

- Accounts Receivable
 - Business License
 - Court Docket
 - Miscellaneous Receipts
 - Property Tax
 - Utility Billing
 - General Ledger
-

Special Features

- The Point-of-Sale System can serve as a stand alone system or can be integrated with Miscellaneous Receipts System.
- Extensive security features allow securing cash drawers by cashier.
- Multiple charges and payment types can be entered on a receipt. The system will automatically compute the customer's change.
- Specific references can be assigned to a charge to track a permit or an application number.
- Customized receipts can be printed on a variety of forms through user-defined forms generation.
- Validation printing is available for payments such as checks or money orders. The validation is customized for each site through user-defined forms generation.
- Receipts can be voided on the system. All System Z General Ledger entries necessary to void the receipt are done automatically.
- Cashiers can balance and close their cash drawers at any time. The breakdown of charges and payments can be displayed or printed.
- Unlimited history is maintained on all receipts. Reports allow monitoring of charge activity for any date range.
- The System Z General Ledger distribution can be entered on each receipt or automatically distributed to the ledger based upon the charge type. Charges can be distributed to different ledger accounts by a percentage amount or by a flat amount.
- An interface to the System Z General Ledger System allows ledger accounts to automatically be updated for all charges.
- Receipt and validation printers and electronic cash drawers can be used with the system.
- With the Point-of-Sale System, some potential charges include recreation fees, employee insurance, water taps, deposits, rentals and leases, accident reports, fines, permits, and taxes.
- Our Customer Service Department offers a wide variety of services such as modem, and internet-based support, file conversions, disaster recovery planning, e-mail support, and advanced training seminars.
- Cash drawer overages and shortages can be tracked to the cashier level.
