Payroll

LGC's Payroll software is designed to be the most comprehensive payroll system available and is in use at hundreds of local governments across Tennessee and Alabama. It can meet the demands of even the largest payroll systems.

LGC's Payroll software allows payment from an unlimited number of funds and departments. It also allows an unlimited number of deductions, leave types, and user-defined pay adjustments. Tax sheltered deductions and cafeteria plans are no problem for LGC's Payroll software. Payroll will even record the exact date and reason an employee took leave. Lookup features make selecting employees, deductions, adjustments, and funds quick and easy.

LGC's Payroll software boasts extensive reporting features. Annual, as well as, quarterly reports (like the 941 quarterly tax return) are generated quickly and easily. Employment security, state retirement, and W2 reports can be submitted on magnetic media.

The screenshot shows the 'PYF010 - Employee Master' window. It contains the following information:
