

## Z Software Release Notes

<u>Application</u>	<u>Customer Release Notes</u>
AP	The Vendor Reports were updated to include the VCC range as a filter option.
PP	The Deduction Register was updated to include the runtime question "Print SSN" to control whether or not the SSN prints on the register.
UB	The Collection Agency Report was updated to also include the phone number from screen 2 of the customer account. The phone number prints under the name.
UB	The Exception Edit Report was updated to check loan services and if the billed amount is greater than the contract amount, print the message "Loan Billed > Than Contract". When this prints users should check the service and make corrections to fix the problem.
UB	TVA Special Programs, Green Power, Master File Maintenance, P-print mode was updated to make the report print based on contract date range. History File Maintenance, P-print mode was updated to make the report print based on billing period range and to correct problems where the detailed report would not print.
UB	UBY100 can be used to export service addresses to a file so they can be standardized and imported back into the software also using UBY100. Contact support for additional information.
